golabs

encora
Case Study

Two software entities, working Together for more than 6 years.

Since its inception six years ago, **Golabs has consistently provided high quality, sought-after engineers to join Encora's teams on an as needed basis.**

Encora contacted Golabs as they were searching for an outsourcing partner who could bring in talented, high-level software developers who were also trustworthy with proprietary information.

Discovering top talent who can add value from day one on a project is no easy feat, **But...**

Golabs has a unique recipe to secure outstanding candidates

Candidates who have the required:

- ✓ Hard Skills
- ✓ Greats Results
- ✓ Soft Skills
- ✓ Short Time

1 »

Our strategy at Golabs

Create an internal work environment that attracts the best and brightest engineers on an international level.

2 »

We create an atmosphere where our engineers thrive and find a high level of work satisfaction.

Accordingly, Golabs has a high-level recruitment process and was able to provide the type of talent that Avantica needed by tapping into our own staff portfolio and also through our networks.

3 »

From the development perspective

Engineers and developers used the agile methodology Scrum with a master and product owner.

By partnering with G golabs®

a nearshore tech company
