

HEALTH TECH CASE STUDY

What
they do?

Radicle is changing how we do science testing

Radicle's transformative AI-driven clinical trial approach generates the industry's first large-scale predictive health data at unprecedented affordability and speed, resulting in the much needed proof of effects for brands, consumers, retailers, and healthcare professionals.

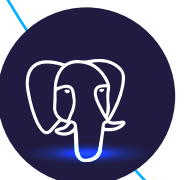

Know **Our Challenge**

Our current challenge at Golabs is designing and developing a complete, practical and safe software architecture using the best practices in the field to obtain world class results.

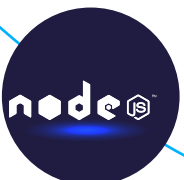

TECH STACK

AWS

PostgreSQL

Node
Express

Typescript

NextJS

Python

GraphQL

For the first time in history, any natural health product or dietary supplement company **can have the clinical proof to develop innovative and effective products, market strong defensible claims and gain the confidence of consumers, healthcare providers, retailers.**

Solution Journey

At its core, **Radicle Science is a rebellion against the status quo of research and healthcare** and a movement towards personalized, proven health and wellness treatments with the potential to deliver well-being for all generations.

Radicle Science is a startup with less than 2 year in the market.

Their scientific studies focus on natural medicine, particularly in all of the Cannabis derived substances such as CBD, THC. .

Most of the Radicle team is based in Los Angeles California, where medicinal and recreational marihuana consumption is legal.

Team members come from places like: Costa Rica, Mexico, USA, Turkey, India & Dubai.

Working with disruptive companies is a welcomed challenge at Golabs.

In less than 1 year since working together, our engineers have been instrumental in their innovation process and getting **Radicle Science** into a new technological playing field.

We hired engineers in record time to overcome tight deadlines and aligned smoothly to deliver outstanding results.
